Bar set high

Message

Winnefox Library system- I want to commend you on a solid system that is ran with such efficiency. I grew up with Berlin as my home library and called Green Lake my home library through college (and still is when I return home). I've experienced many public library systems in the last 10 years and none compare to the operation you are running in the Fox Valley. I didn't realize how spoiled I was growing up with the Winnefox System, or how much I would miss it when I moved away. The public library is always a pillar of the community for me. Thank you for setting the bar high and providing so many patrons with requested materials so quickly! I wish all public library systems worked as smoothly as you do!

Thank you,
